

Client Outreach Dossier: Austin's Greatest Plumbing

Human-Crafted Direct Outreach Strategy, Phone Scripts & Email Sequences

Target Entity: Austin's Greatest Plumbing
(austinsgreatestplumbing.com)

Recommended Channel: Email (Primary) / Phone
(Secondary)

Key Leadership: Rachel Humphreys (Owner & Principal)

Location: 2210 Melissa Oaks Ln, Austin, TX 78744
(South Austin)

Key Audit Findings: Flawless 5.0 rating across 319 reviews; 5.38s mobile download latency; Mailgun-only MX architecture without DMARC.

Primary Outreach Channel: Email Copy

To: austinsgreatestplumbing@gmail.com (Attn: Rachel Humphreys)

Subject: 5.0 rating & mobile bounce rate

Rachel,

Noticed Austin's Greatest Plumbing holds a flawless 5.0 rating across 319 reviews — easily the highest quality score in South Austin.

However, when homeowners search for emergency repairs on mobile, your homepage takes 5.4 seconds to load before displaying a click-to-call button. In plumbing, over 40% of emergency mobile searchers bounce back to Google if a page takes more than 3 seconds.

Put together a 2-minute teardown showing how sub-2s mobile speed and automated quote triage can recover an estimated 10–15 emergency calls a month.

Worth a look?

Call Line: (512) 377-9919

Target: Rachel Humphreys

Gatekeeper Opening:

Hi, quick question — who oversees your website dispatch and emergency call intake? Is that Rachel?

(If asked what it's regarding):

I put together a 1-page benchmark on South Austin emergency call response times comparing your mobile speed to local competitors. What's the best email to send that to Rachel?

Direct Pitch (Once Connected):

Hey Rachel, Joel calling. You weren't expecting my call — got 30 seconds, or did I catch you in the middle of a job?

I noticed you hold a flawless 5.0 rating across 319 reviews, which is almost unheard of in Austin. But when I ran mobile telemetry on your site, it took 5.4 seconds to load on mobile phones. When someone has an active water leak, that delay usually causes them to hit back and call someone else.

Curious — is optimizing emergency mobile conversions on your radar this quarter, or is your schedule completely full right now?
