Subject: bot screen on mobile

Gary and Cynthia,

Noticed Clarke Kent Plumbing has a strong 600+ review reputation along Ben White Blvd.

However, when visitors visit your site on mobile, an automated bot challenge screen ("One moment, please...") appears before the homepage loads. When a homeowner has an urgent plumbing leak, that extra screen causes over 30% of visitors to bounce and call another contractor.

Put together a 2-minute teardown showing how to remove this barrier and automate emergency dispatch triage.

Open to seeing the fix?

Secondary Outreach Channel: Phone Script

Call Line: (512) 477-2200

Target: Gary Hacker or Cynthia Clarke

Gatekeeper Opening:

Hi, quick question — who manages your website and emergency dispatch systems? Is that Gary or Cynthia?

Direct Pitch (Once Connected):

Hey Gary, Joel calling. You weren't expecting my call — got 30 seconds, or did I catch you in the middle of something?

I was looking at Clarke Kent's site on Ben White. You've got over 600 reviews, but when I tested your site on mobile, a bot challenge screen pops up asking visitors to wait before the page opens. For someone with water pouring into

their hallway, that screen sends them straight to competitor ads.

Curious — did you guys know that challenge screen was active on mobile, or is website tech handled by an outside agency?
