

DUAL-TRADE GROWTH

The \$216,000 Cross-Sell Silo

If you offer Plumbing AND HVAC, why are 88% of your plumbing clients calling your competitor for AC?

88%

Uncaptured Secondary Trade Volume

The hidden friction point inside dual-trade mechanical contractors.

THE BOTTLENECK

Why Field Techs Don't Cross-Sell

Most owners blame their technicians: "They just don't remember to ask."

01

Technicians Are Fixers, Not Marketers

A plumber's focus is resolving the immediate leak, clearing the drain, and moving to the next ticket.

02

Software Operates in Silos

The dispatch CRM records the plumbing invoice, but never alerts the HVAC department to follow up.

FINANCIALIZED MODEL

The Cost of Disconnected Silos

In our audit of an 18-van dual-trade contractor (Summit Mechanical):

\$18k/mo

Forfeited Recurring Cash Flow

1,200 single-trade residential accounts with zero automated cross-sell.

Annualized Value: \$216,000

Lost recurring maintenance memberships and high-ticket pull-through equipment replacements.

THE ARCHITECTURE

The 3 Automated Cross-Sell Workflows

Automate the handoff so technicians never have to pitch:

01

Invoice Sign-Off Webhook

CRM webhook detects a single-trade completed job and tags the customer profile automatically.

02

Seasonal Cross-Trade Inspection Offer

Triggers a complimentary pre-summer AC inspection or winter water-heater check 14 days later.

03

Unified Dual-Trade Membership

One membership agreement protecting both HVAC and Plumbing for high client lifetime value.

ENTERPRISE IMPACT

Predictable Cash Flow & Client Retention

Contractors with unified membership agreements command 3x valuation multiples:

Zero Churn to Competitors

Customers with dual-trade memberships don't search Google Maps when emergencies happen.

Smooth Out Shoulder Seasons

Recurring membership revenue keeps trucks running during slow spring and fall months.
